# Test plan: Enterprise Business Intelligence Suite (DA-01)

| ID | Area | Test | Expected | Result |
|---|---|---|---|---|
| T1 | Load | Run 01_schema.sql and 02_load (usp_load_all) on BIWarehouse | No errors | PASS |
| T2 | Data quality | Run tests/data_quality_tests.sql | All six checks PASS | 5 PASS, 1 expected FAIL (see note A) |
| T3 | Measures | Total Sales card equals SQL SUM of dw.FactSales | Values equal | PASS (109.28M) |
| T4 | Time intelligence | Sales YoY Growth % shows a value | Calculated value | 0.00 (see note B) |
| T5 | RLS | NA account sees 6 territories, EU sees 3, APAC sees 1 | 9 security rows, 3 regions | PASS (9 rows, 3 regions) |
| T6 | Refresh | Scheduled refresh in Power BI Service | Status Completed | Not tested (Desktop only) |
| T7 | Performance | Executive page load time (Performance Analyzer) | Under 3 seconds | Not measured |

Row counts used in tests:

• dw.FactSales rows: 104,069

• dw.DimRegion rows: 9

• Negative gross profit rows: 21,731

## Notes

**A. GrossProfit check (expected FAIL).** 21,731 of 104,069 sales lines (about 21%) have a price below standard cost in the AdventureWorksDW2022 source. The warehouse loads these rows unchanged, so the check correctly reports them.

**B. YoY limitation.** The source covers November 2020 to January 2021, so there is no prior year to compare against. Sales YoY Growth % therefore shows 0.00. This is a data limitation, not a calculation error.

**C. Quota.** Quota is linked to region, not to the date table, so it does not filter by year. Quota by region works.

**D. Region split.** Before the relationship fix, every bar had the same length because the Dim Customer path was active. Making the FactSales to DimRegion relationship active fixed the split.
